Weather Watchers Presentations

**Monday, February 24 at 2:15
School Cafeteria**

Parents are invited to join us in the cafeteria to see the students present their learning about severe weather.

Curriculum this Week

Math

We will practice using mental math to give 10 or 100 more and less of a 3 digit number.

Example: 10 more than **279** is 289.

100 more than **279** is 379.

10 less than **279** is 269.

100 less than **279** is 179.

We will work on accuracy when finding the total of several 2 digit numbers.

Literacy

Students will plan, write, revise, and edit a narrative about a paleontologist who finds a fossil.

In small groups, students will continue to work on spelling patterns for the current spelling unit, and story structure of a narrative.

We will study Letterland Unit 13 this week. The spelling patterns this week are ur and ir.

Science

We will begin learning about weather this week. Students will learn about the weather tools that meteorologists use to make predictions about the weather.
